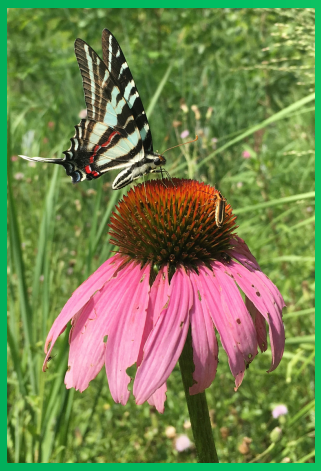
THE GRAIL GREENHOUSE

The Grail believes in and supports initiatives that create community-wide solutions and breaks down barriers of competition between organizations. This greenhouse project is one such initiative. With contributions from donors like you, The Grail proposes to build a greenhouse dedicated to the nurturing of native plant species for the use in rewilding and transforming both the 70+ acres at The Grail headquarters, but also local community projects and residential areas in partnership with Love Our Land and other community-based organizations.

This summer, a local high school senior came to The Grail as a location for her Senior Capstone. Savannah Wilber, Mt. Notre Dame High School '24, spent her summer researching and designing a greenhouse to support the efforts to rewild the community. Thanks to Savannah's hard work, The Grail is ready to take the next step, gathering the resources needed to make the dream a reality. With a goal of sustaining the greenhouse in years to come, The Grail and Love Our Land hope to initiate plant sales to the general public within three years.



The ability to grow native species plants like trees, bushes, and grasses will have benefits for the greater community on many levels:

- **Providing nutrients into the soil and for the native pollinators**
- **Supporting actions at community and individual levels to replace invasive species with native species**
- **Introducing scientifically-based experimentation and environmental education for all ages**
- **Creating tangible contributions from one community organization to others strengthening the web of cooperation and mutual support**

Advancing several United Nations' Sustainable Development Goals (#11: Sustainable Cities and Communities, #13: Climate Action, #15: Life on Land, and #17: Partnerships for the Goals).

GREENHOUSE SPONSORSHIP OPPORTUNITIES

The Grail financial contribution will include the preliminary costs (permits, engineering and architectural fees, staffing, grading, electrical upgrades, water catchment system, and ongoing care). The Grail is and is seeking support from the community for the build:

- **Basic greenhouse: $25,000**
- **Greenhouse upgrades: $35,000**
- **Startup costs (seed, tools, soil, pots): $5,000**

Your sponsorship of the Grail Greenhouse Project can be at a level you feel most comfortable. Recognition of your gift could include social media posts, an onsite educational program for a group (up to 15 people), or 1-3-year naming rights to sections of property actively benefiting from the greenhouse. To discuss options, please contact us.
